

# The Bed of Nails experiment is easy and fun to do!

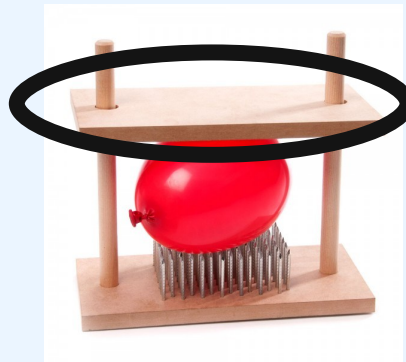

In this brochure you will find websites that are easy to follow and are rated well.

This science project is easy to research shows a great topic in science.

## How to do it safely

1. Have a parent supervise as you build and conduct the experiment.
2. Remember that you are working with nails so make sure no pets or small children are around so they don't hurt themselves.
3. Make a hand guard to protect your hand so you don't smash your hand in to the nails when the balloon pops.

## Bed of Nails

### Top Resources for Information

BE CAREFUL!

# Websites!

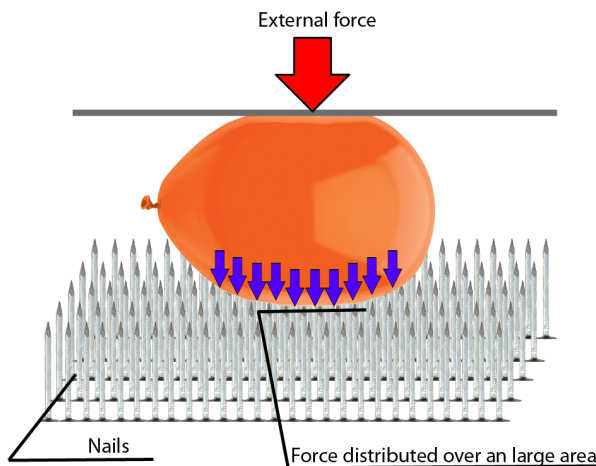

Force and Area

<http://www.physlink.com/Education/AskExperts/ae8.cfm>

**Rating:**

**5/5**

It is a short good summary on how a balloon won't pop on a bed of nails.

# Websites!

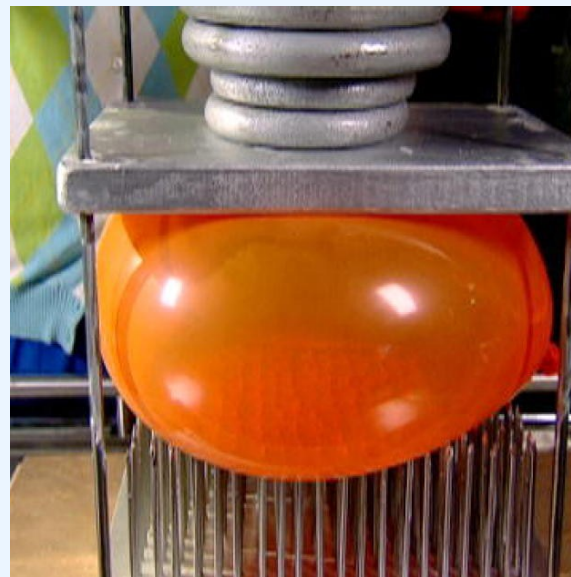

Steve Spangler Bed of Nails

<https://www.stevespanglerscience.com/lab/experiments/bed-of-nails-physics-lesson/>

**Rating:**

**4/5**

It gives a good summary about the topic and covers the science behind this cool trick!

# Videos!

- **The Spangler Effect - Bed of Nails**

<https://www.youtube.com/watch?v=cM3lOjR5n-l>

**Rating:**

**5/5**

- **Bed of Nails - Cool Science Experiment**

<https://www.youtube.com/watch?v=vo2iE94iAoA>

**Rating:**

**4.5/5**

The videos give great information and help show how to the project correctly and safely.
