

WE RATED THIS  
WEBSITE BASED ON  
USEFULNESS

OUR CRITERIA FOR THE  
WEBSITES WAS BASED  
ON IF THEY WERE UP  
TO DATE

ALSO WE RATED THEM  
IF THEY HAD  
ACCURATE  
INFORMATION AND IF  
THE INFORMATION  
WAS HELPFUL TO THE  
EXPERIMENT

# Amazing Color changing Milk !!!!!!!!!!!!!!!

### Ratings.

The best web site that we found was Steve Spangler Science.com

We think this is the best website because it gave easy to understand accurate information. Also it gives easy step by step directions that walked us through the process of the experiment

## MATERIALS

The materials that you will need for this experiment are .

- Dish Soap
- Food Coloring
- Dinner Plate
- Cotton Swabs

Now to start you need to put the milk on the dinner plate. Then, you put drops of different food coloring on the dinner plate. Then dip then dip the cotton swab on the dish soap then dip the cotton swab on to the milk.

## Facts for experiment

In this part of the brochure we will be giving some extra tips that could make your project better

- We have found that Dawn dish soap works best when the colors change
- Also 100% cotton swabs work best
- We have also found out that you can use any color dye you want
- And we have found out that 2% milk is the best choice of milk for this experiment
